Hello, Sukhman !

Your Email: sukhman@medicare.com

JMeter

The image displays two screenshots of the Apache JMeter GUI, showing the configuration of a Thread Group and the resulting Aggregate Report.

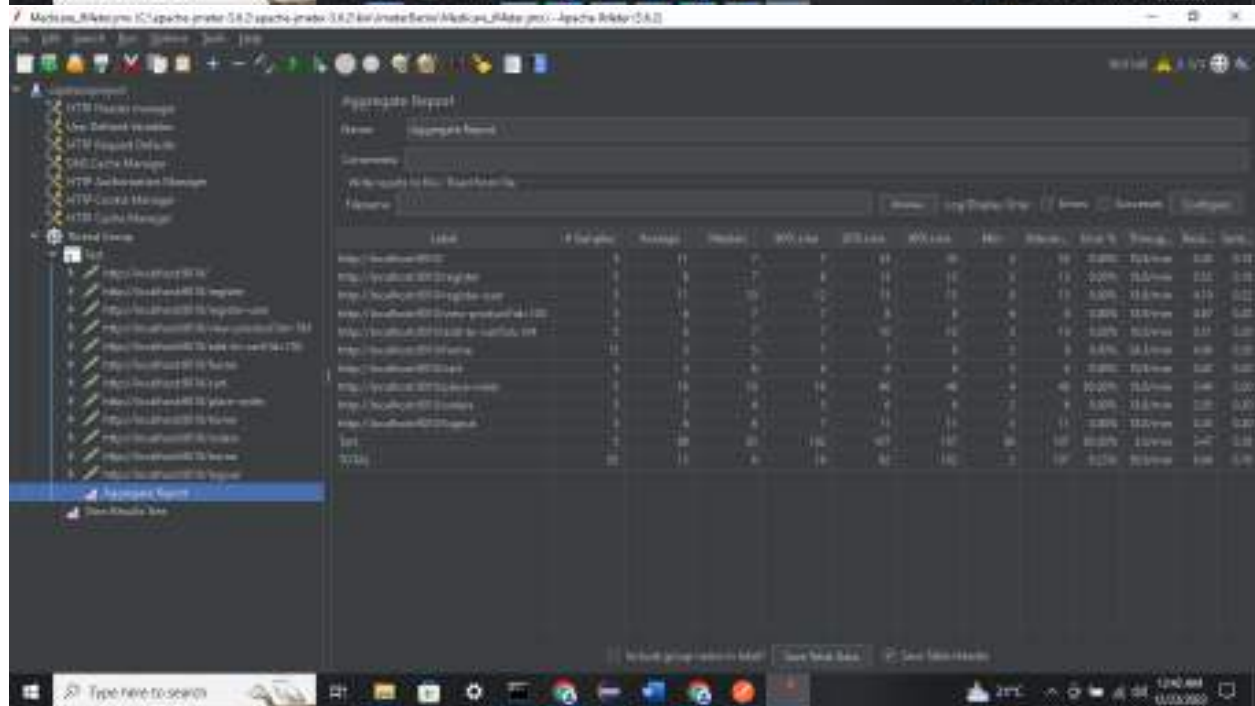

Top Screenshot: Thread Group Configuration

The Thread Group is named "Thread Group". The "Number of Threads (users)" is set to 10. The "Ramp-up period (seconds)" is set to 10. The "Loop Count" is set to "Forever". The "Scheduler" is set to "Default". The "Thread Name" is set to "Thread-1". The "Thread Group" is expanded, showing a list of threads.

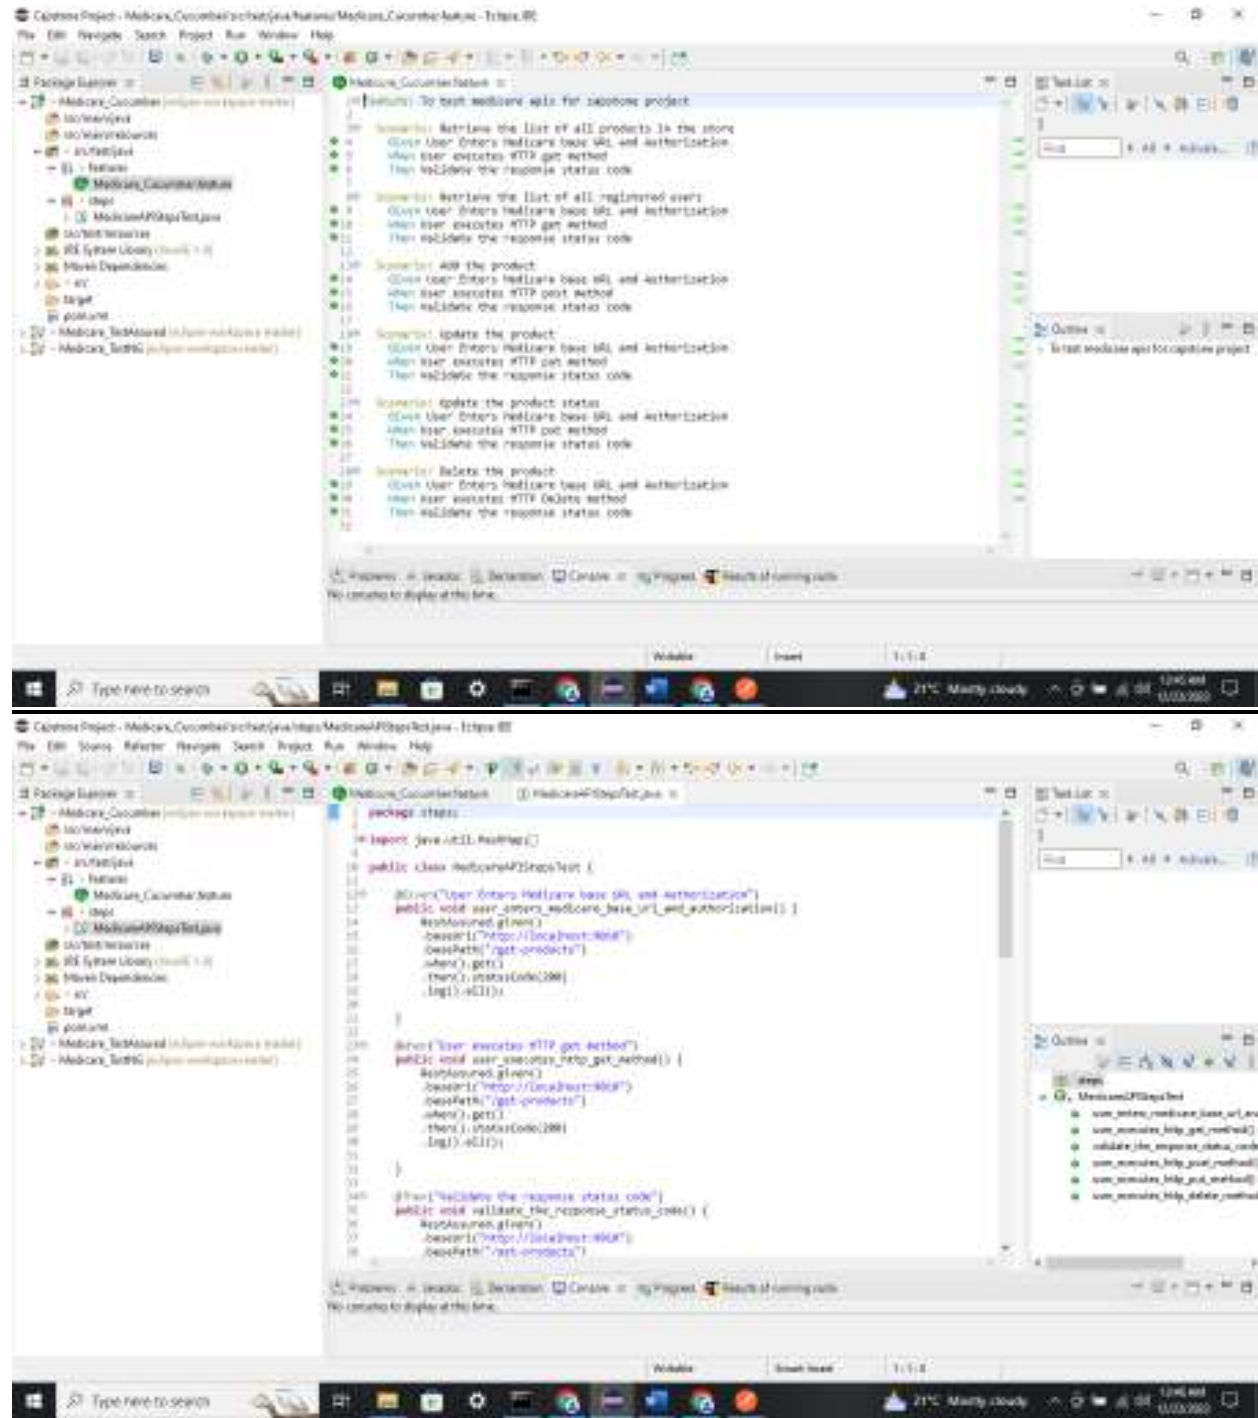

Bottom Screenshot: Aggregate Report

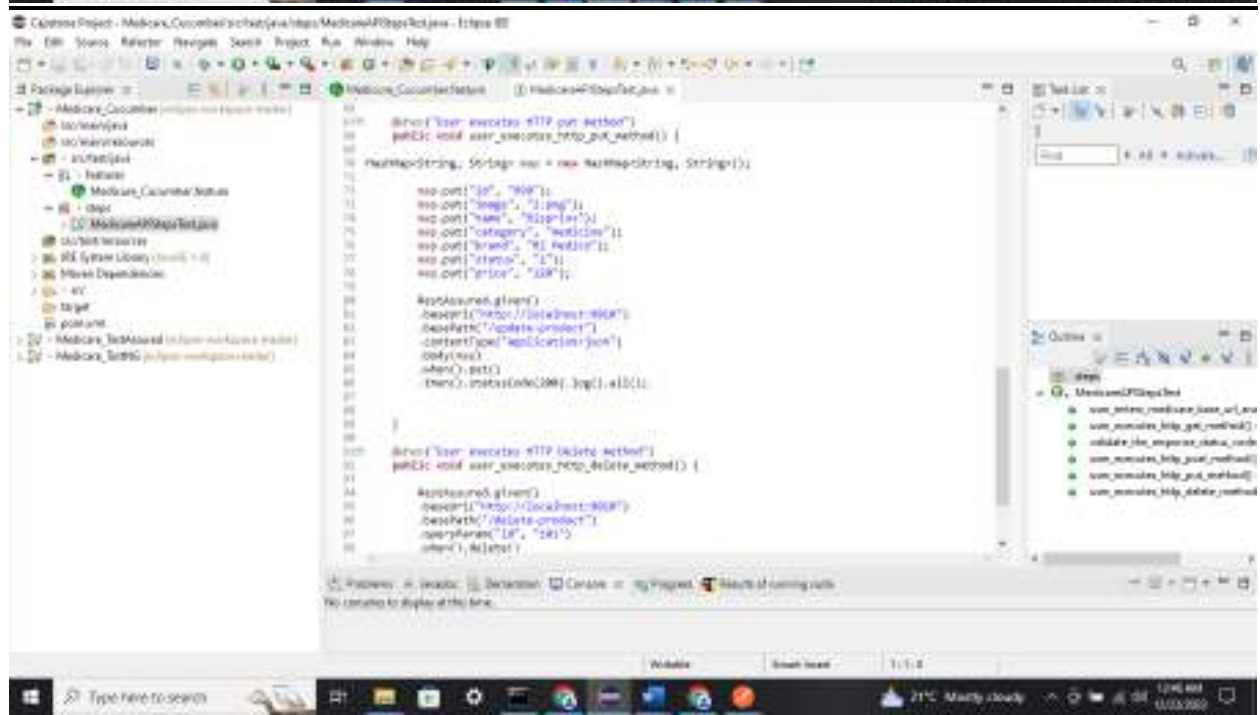

The Aggregate Report shows the results of the test. The "Aggregate Report" is named "Aggregate Report". The "Aggregate Report" is expanded, showing a table of results.

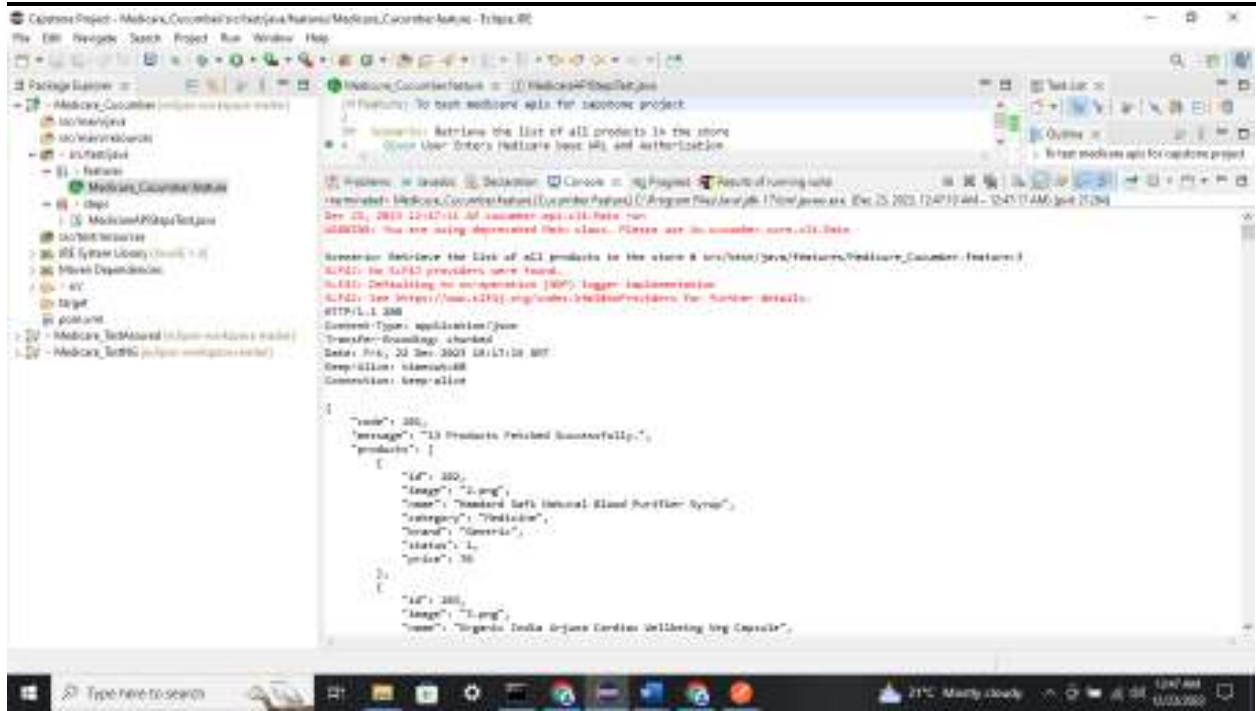

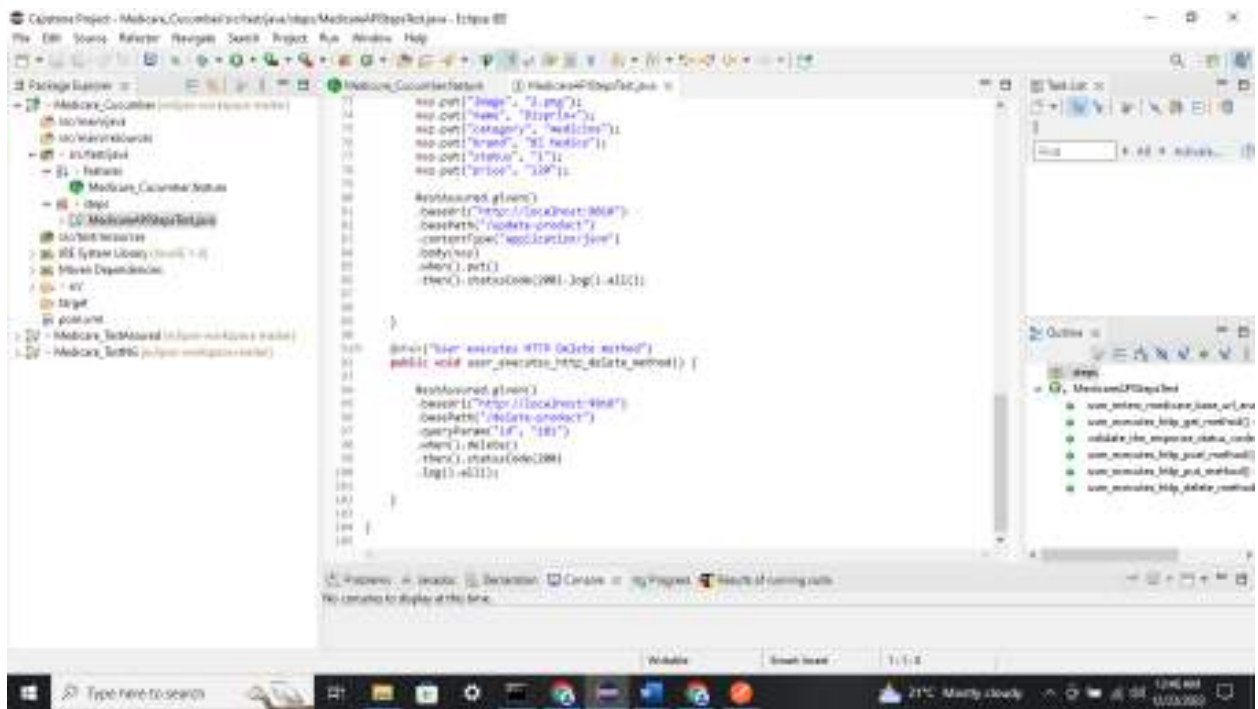

Label	# Samples	Average	Median	90% Line	95% Line	99% Line	Min	Max	Standard Dev.	Err. %	Throughput	Success %	Sample Size
http://www...	1	10	10	10	10	10	10	10	0.00%	0.00%	10.00/sec	100%	10
